Descrição do Programa de cursos integrados

Data Engineering on Google Cloud Platform

This five-week, accelerated online specialization provides participants a hands-on introduction to designing and building data processing systems on Google Cloud Platform. Through a combination of presentations, demos, and hand-on labs, participants will learn how to design data processing systems, build end-to-end data pipelines, analyze data and carry out machine learning. The course covers structured, unstructured, and streaming data. This course teaches the following skills:

- Design and build data processing systems on Google Cloud Platform
- Leverage unstructured data using Spark and ML APIs on Cloud Dataproc
- Process batch and streaming data by implementing autoscaling data pipelines on Cloud Dataflow
- Derive business insights from extremely large datasets using Google BigQuery
- Train, evaluate and predict using machine learning models using Tensorflow and Cloud ML
- Enable instant insights from streaming data

This class is intended for developers who are responsible for:

- Extracting, Loading, Transforming, cleaning, and validating data
- Designing pipelines and architectures for data processing
- Creating and maintaining machine learning and statistical models
- Querying datasets, visualizing query results and creating reports

>>> By enrolling in this specialization you agree to the Qwiklabs Terms of Service as set out in the FAQ and located at:

Perguntas Frequentes - FAQ

Como devo mencionar o Certificado de Programa de cursos integrados do Coursera em meu currículo?

Recomendamos que mencione deste modo: "Data Engineering, Big Data, and Machine Learning on GCP, um Programa de cursos integrados composto por 5 cursos, oferecida pelo(a) Google Cloud em parceria com o Coursera. Certificado de Programa de cursos integrados emitido em July 19, 2019".
