Course Description

This course introduces you to important concepts and terminology for working with Google Cloud Platform (GCP). You learn about, and compare, many of the computing and storage services available in Google Cloud Platform, including Google App Engine, Google Compute Engine, Google Kubernetes Engine, Google Cloud Storage, Google Cloud SQL, and BigQuery. You learn about important resource and policy management tools, such as the Google Cloud Resource Manager hierarchy and Google Cloud Identity and Access Management. Hands-on labs give you foundational skills for working with GCP.

Note:

- Google services are currently unavailable in China.

✔ Account Verification

This person's account is verified. Coursera certifies their successful completion of the course work.

Frequently Asked Questions

How should I list my course on my resume/C.V.?

We'd recommend "Google Cloud Platform Fundamentals: Core Infrastructure by Google Cloud on Coursera. Certificate earned at Monday, September 23, 2019 2:21 AM GMT".
